TECHNICAL SPECIFICATIONS: 370 Pneumatic Timer Valve

About this valve

The MGE Type 370 Pneumatic Timer Valve is used for fire extinguishing systems. The guick action valve for Inert gases can be manual activated by using a handwheel or pneumatically activated by using the M26x1.5 connection. The valve is also equipped with a bursting disc.

The valve is manufactured in Denmark on state of the art manufacturing equipment, and the quality is monitored throughout the entire process. The valve is assembled on an automated assembly line and the valve is subjected to a 100% functional test. After passing all tests on the assembly line it is securely packed for shipping.

BAM Approved: Acording to ISO 17871 Working pressure: 200 bar Approved test pressure: 190 bar Inlet connection: 25E according to ISO 11363-1, or other on request Inlet filter: On request Outlet connection: W21,8x1/14 DIN 477-1, or other on request Dip Tube thread: M 16 x 1, or other on request Activation: Pneumatically or by handwheel Handwheel: Aluminium handwheel Ø65 Burst disc: According to CGA S 1.1 or TRG 254-2 Nr. 1 Tape / Plastic protection cap: On request Gas: Argonite, Halon, N2, Ar/N2, CO2 (filling factor 0.68) Passage: Ø12 mm
