

Müller Gas Equipment A/S, Sønderborg

Müller Gas Equipment is looking for a blacksmith to join our team in Sønderborg, Denmark. You will be part of a team with colleagues in our forging department.

We hot forge our brass valves in our forging workshop. We heat the brass billet in an furnace and press the billet into shape with up to 750 t with two die halves, after which the workpiece comes out and cools down. These are then deburred, and swarf blasted.

The workpieces are then sent to our machining department.

Profile:

- You are a trained blacksmith / industrial technician.
- You are able to work independently
- Engaged and with attention to detail

We can offer:

- Interesting and challenging work
- Competitive salary according to qualifications
- Flexible working hours

We would like you to start working as soon as possible

Please send your written application via email to tr@bmv.dk with the subject line "Blacksmith" as soon as possible.

For more information about the company and to watch a presentation video, visit our website: <https://bmv.dk/>

If you have any questions, feel free to contact our Operations Manager, Thorsten Rossen, at (+45) 29 40 77 98.
