

# Constructor / Development Engineer

## ***Müller Gas Equipment A/S, Sønderborg***

For our development department in Sønderborg / Vollerup, we are looking for a mechanical engineer, mechanical technician (or similar education) who can help expand our product program within valves and regulators for the gas, fire extinguishing and medical industries.

We are ideally looking for someone with experience and knowledge in mechanical development/design but will also provide the necessary support for the job.

### **Work tasks for the position as a design engineer / development engineer in the development department:**

- Development of new products in accordance with relevant norms and standards
- Preparation of 3D CAD models as well as 2D detail and assembly drawings in Solid Edge
- Strength calculation and testing of prototypes in our test lab
- Preparation of test reports (prototype tests / customer complaints)
- Implementation of data in our ERP system and maintenance of master data
- Communication with customers, suppliers and authorities in Danish, English and possibly German
- Project management and internal communication with the relevant departments (forging, machining, assembly department...)

### **Profile:**

- Educated as a mechanical engineer, mechanical technician or similar education
- Preferably also a person with professional training in iron and metal with a theoretical superstructure
- You have technical flair, paying attention to details and are carefully
- Knowledge of 3D CAD drawing program, preferably Solid Edge
- Preferably with experience in strength, pressure and flow calculation or similar simulation
- Preferably knowledge of ERP system Axapta (Microsoft Dynamics) or similar system (SAP etc.)
- You are good at communicating in written and spoken Danish, English and preferably also German
- You must be goal-orientated, structured, persistent and able to work independently and in teams
- You are open and honest with a positive attitude

Date of employment: 01 February 2025 or by agreement.

We look forward to receiving your written application via e-mail with the subject line " Constructor / Development Engineer" - preferably as soon as possible, by e-mail to [info@bmv.dk](mailto:info@bmv.dk)

Further information about the company and a presentation video can be found on our website: <https://bmv.dk/>

If you have any questions, please contact our Development Manager Hauke Torp at (+45) 73 42 12 55.

*Müller Gas Equipment A/S is an order and series production company whose main production is gas valves / regulators for gas cylinders, natural gas, and medical and technical gases. The company currently employs approximately 145 people.*
